

Featuring a NEW and IMPROVED Dispensing System

SILVERWARE BAGS

Handgards' SafeGards™ Silverware Bags are the best way to protect each silverware setting from being contaminated by harmful contaminants. Keep your silverware clean with a convenient flap closing. With the recent COVID-19 pandemic, we are now becoming more aware of our surroundings and the everyday items we use, WeCare™ Silverware Bags are perfect for restaurant, carry out and catering services. WeCare™ Silverware Bags are made of our high-density polyethylene (HDPE) which is a very durable and flexible material. These Silverware Bags can withstand temperatures down to -50°F and up to 220°F. A convenient flap also allows you to open and close the bag with minimal effort. The COVID-19 pandemic has changed the food service industry's guidelines for all eating establishments in the United States and there will be new measures put in place to protect your employees and customers.

Our WeCare™ Silverware Bags can provide a safe barrier to protect you from any contaminants that are present in your establishment. WeCare™ Silverware Bags are disposable and easy to keep your clean silverware or plastic utensils from being contaminated by harmful contaminants. Versatile in size with a 4 inch width to accommodate all silverware or disposable utensils, it is designed for storage and handling, allowing for safe transport, temporary store and dispensing. This new silverware bag offering comes in a new dispensing case designed to eliminate additional costs for accessories, such as a bag holder. Each bag comes in a saddle pack that can be placed in the slots that are in the case the bags are shipped and packaged in which makes it an easy-to-dispense system. Save time vs. rolling each set of utensils by simply inserting what is needed for an individual sanitary meal. WeCare™ Silverware Bags are also perfect for packing individual treats such as mini-cookies, pretzel sticks and more!

New Dispensing System
